MIRMORSAL MADANI

Product Manager | Technical Product Ownership & Enterprise Systems

Wrocław, Poland | +48 452 984 012 | mirmorsal.madani1361@gmail.com

Portfolio | **LinkedIn**

PROFESSIONAL SUMMARY

Product Manager with 8+ years of experience across enterprise software and FinTech, including hands-on Technical Product Ownership. Experienced in system analysis, functional requirements, API integrations and end-to-end feature delivery, from discovery to post-launch improvements. I combine direct work with engineering teams and business experts with product leadership, supported by a PhD in Computer Software Engineering and a background in R&D, data analysis and software development.

CORE STRENGTHS

System analysis & functional requirements • Hands-on product ownership • PRDs, user stories & acceptance criteria • API & third-party integrations • Event Storming & R&D • Agile/Scrum & cross-functional delivery • B2B stakeholder collaboration • Product analytics & optimization

INDUSTRY EXPERIENCE

TOP FAST TECHNOLOGY | Dubai, UAE

Chief Product Officer | May 2024–Present | Remote

- Lead product direction, prioritization and delivery across an enterprise FinTech portfolio, aligning business goals, engineering dependencies and release plans.
- Built and now lead the Product Management function, hiring and coaching Product Owners, designers, Scrum and BI specialists; introduced clear team responsibilities, structured backlogs and early QA involvement.
- Alongside CPO responsibilities, continued hands-on Technical Product Ownership of initiatives started as PM, supporting later development phases, releases and improvements, while leading new mobile product delivery. Facilitated R&D and Event Storming with business experts and engineering teams.

Product Manager | May 2023–May 2024 | Hybrid

- Served as hands-on Product Owner for Brokerage CRM, IB & Referral, Social Trading and Loyalty Club, handling discovery, system analysis, user flows, functional requirements and feature prioritization as the product streams progressed in phases.
- Led the replacement of a difficult-to-use monolithic CRM with an ABP/microservices-based platform, working with the existing engineering team to deliver and launch the new CRM in under eight months.
- Reviewed Figma prototypes with stakeholders and used customer feedback, Hotjar and usability testing to improve workflows and guide post-launch iterations.

DELTAFX | Product Manager / Business Intelligence | Aug 2020–Mar 2023 | Part-time, Hybrid

- Led an earlier brokerage Risk Management product from the initial idea through requirements and delivery; worked closely with trading, operations and engineering teams.
- Analysed trading and customer data using SQL, Python and Power BI, finding behavioural patterns and sharing practical insights with sales and management.

SHOKOUHEJAVID IRANIAN (SJI) | Product Owner | Jul 2018–Aug 2020 | Part-time, Hybrid

- Served as hands-on Product Owner for enterprise HR and internal workflow systems, conducting stakeholder discovery and system analysis, defining functional requirements and user flows, and coordinating iterative delivery with engineering teams.

SELECTED PRODUCT PROJECTS

Brokerage CRM | Product redesign and launch

Owned product discovery, functional requirements and cross-team delivery for a redesigned CRM launched in under eight months. Improved trader and admin journeys and operational workflows; deployed across several brokerages. One client served 25,000+ traders with 50+ support and back-office staff.

IB & Referral Platform | Multi-level partner management

Acted as hands-on Product Owner for a CRM-integrated platform covering multi-level IB networks, KPI scoring, commission rules, partner workflows and reporting. One deployment supported 500+ Introducing Brokers.

Loyalty Club | Customer engagement and retention

Owned product discovery, requirements and iterative delivery for segmentation, reward models and a configurable quest engine with nested conditions, supporting gamification and customer engagement.

Risk Management | Behaviour-based monitoring

Led early Risk Management discovery and requirements at DeltaFX; later oversaw product direction and requirements reviews with the assigned Product Owner at Top Fast. Capabilities covered trader segmentation, behavioural analytics, ML-supported classification and real-time alerts.

Social & Copy Trading | Trader and follower experiences

Served as hands-on Product Owner across successive releases, defining requirements for copy-trading plans, allocation models, ProTrader discovery, performance views and follower controls.

Native CRM Mobile App (Flutter) | iOS & Android feature delivery

Owned mobile product requirements and feature delivery, extending an existing web CRM to iOS and Android. Worked directly with engineering on trading accounts, wallet flows, reporting, permissions, campaigns and backend service integrations.

Techosoul UI — Open-Source React Design System

Led product definition, design-system architecture, component prioritization and release planning for an open-source React/TypeScript UI library built on Ant Design 6.

Shipped design tokens, Light/Dark themes and reusable components for financial and data-intensive interfaces; coordinated engineering, validation and documentation through public npm release @techosoul/ui@0.3.0.

GitHub: https://github.com/morimdn/Techosoul-UI

npm: https://www.npmjs.com/package/@techosoul/ui

INDEPENDENT CONTRACT PRODUCT

HR Management PWA | Independent Product Project

Independently managed discovery, requirements and Figma design, then built and delivered an AI-assisted HR PWA MVP covering onboarding, performance reviews, 360-degree feedback and employee leaderboards. The MVP is in use by the client HR team.

ACADEMIC APPOINTMENTS & UNIVERSITY LEADERSHIP

ISLAMIC AZAD UNIVERSITY | Gorgan Branch, Iran

- Faculty Member: Dec 2010–Jul 2022 (full-time); Aug 2022–Sep 2024 (part-time), alongside overlapping industry roles. Taught software engineering, Data Mining, Algorithm Design and Research Methods; supervised postgraduate research.
- Head of Computer Department: Dec 2010–Apr 2022. Also held a Vice Dean of Education appointment, managing academic staff, programmes and cross-department responsibilities.
- Data Science Researcher: Feb 2016–Mar 2021. Researched text classification, imbalanced datasets, anomaly detection, machine learning and privacy-aware analytics.

SJI — Part-time Senior Product Strategy Advisor and Board Member; enterprise and smart-city product advisory.

PRODUCT & TECHNICAL TOOLKIT

Product & design: Product discovery, roadmapping, user stories, acceptance criteria, Figma, Hotjar, usability testing, Event Storming, Jira, Azure DevOps, Agile/Scrum, QA and release planning.

Data & technology: Python, SQL / SQL Server, PostgreSQL, Power BI, customer segmentation, machine learning, NLP, APIs, AI-assisted prototyping (Codex); collaboration on .NET, React, ABP and microservices delivery.

EDUCATION

PhD, Computer Software Engineering (Software Systems) | Islamic Azad University, Sari Branch

MSc, Computer Software Engineering | Islamic Azad University, Mashhad Branch

BSc, Computer Engineering (Hardware) | Sadjad University of Technology.

RESEARCH GRANT

Principal Investigator (PI) | Islamic Azad University Internal Grant, 2018

Research on privacy-preserving data mining for sensitive-data exchange, using wavelet-based distortion methods while retaining analytical usefulness.

AUTHORED BOOKS

Privacy-Preserving Data Mining | Noroozi Publications, Iran

English for Computer Engineering and IT Students | Makhtumgholi Publications, Iran.

JOURNAL REVIEWING & RECOGNITION

Peer reviewer for Cluster Computing, Journal of Big Data, Social Network Analysis and Mining, Scientific Reports, Cognitive Neurodynamics and Discover Computing.

Led award-winning line-following robotics teams (2013, 2014).
