MIRMORSAL MADANI

Product Manager | Strategy, Leadership & AI
Wroclaw, Poland | +48 452 984 012 | mirmorsal.madani1361@gmail.com
Portfolio | **LinkedIn**

PROFESSIONAL SUMMARY

Product Manager with 8+ years of experience in product roles and a wider background in software engineering, data science and university leadership. I have built product teams, improved how teams work from discovery to release, and stayed closely involved in design, development and testing. My experience covers enterprise platforms, customer-facing products and complex financial software. I hold a PhD in Computer Software Engineering and have taught and published research in machine learning, data mining and NLP. I enjoy turning difficult business and user problems into practical products that teams can deliver and improve.

CORE STRENGTHS

Product strategy & roadmaps • Product discovery & requirements • Team building & coaching • Agile/Scrum • Cross-functional delivery • Customer analytics • AI & data-informed decisions

INDUSTRY EXPERIENCE

TOP FAST TECHNOLOGY | Dubai, UAE
Chief Product Officer | May 2024–Present | Remote

- Lead the product portfolio across Brokerage CRM, IB & Referral Platform, Social Trading, Loyalty Club, Risk Management, trading plugins and a native CRM mobile app; set priorities with business and technical teams.
- Built the Product Management function by hiring and interviewing Product Owners, Product Designers, Scrum Master and BI specialists; organised squads and clearer responsibilities using RACI.
- Established discovery, prototype reviews, structured backlogs, Event Storming, Scrum routines and early QA involvement. Kept direct ownership of selected products, including the native Flutter CRM.

Product Manager | May 2023–May 2024 | Hybrid

- Took the brokerage CRM through customer discovery, requirements, Figma design reviews, launch and further improvements based on user feedback.
- Worked with the existing engineering team to replace a difficult-to-use monolithic CRM with an ABP/microservices-based platform, delivered and launched in under eight months.
- Used customer feedback, Hotjar and usability testing to address UX issues and missing workflows before and after release.

DELTAFX | Product Manager / Business Intelligence | Aug 2020–Mar 2023 | Part-time, Hybrid

- Led an earlier brokerage Risk Management product from the initial idea through requirements and delivery; worked closely with trading, operations and engineering teams.
- Analysed trading and customer data using SQL, Python and Power BI, finding behavioural patterns and sharing practical insights with sales and management.

SHOKOUHEJAVID IRANIAN (SJI) | Product Owner | Jul 2018–Aug 2020 | Part-time, Hybrid

- Managed requirements, user flows and delivery for employee onboarding, HR dashboards and performance evaluation, including 360-degree feedback, scoring and rankings.

SELECTED PRODUCT PROJECTS

Brokerage CRM | Product redesign and launch
Led the product work behind a new CRM launched in under eight months, using the existing development team. The release brought clearer customer journeys, redesigned trader and admin experiences, and more useful operational workflows. Deployed across multiple brokerages. One client brokerage served 25,000+ traders and employed 50+ support and back-office staff.

IB & Referral Platform | Multi-level partner management
Led a flexible platform that integrates with brokerage CRM systems. It supports hierarchical and multi-level IB networks, KPI-based scoring, configurable commission rules and partner reporting. One brokerage deployment supported 500+ Introducing Brokers.

Loyalty Club | Customer engagement and retention
Managed the development of customer segments, club lists, rewards and a quest engine with nested conditions. The platform uses customer actions and journey stages to create more relevant engagement and follow-up flows.

Risk Management | Behaviour-based monitoring
Owned product requirements for trader segmentation, behavioural pattern analysis, machine-learning-supported classification and real-time alerts. The aim was to help risk teams spot recurring trading patterns, reduce manual work and make better decisions without disrupting legitimate trades.

Social & Copy Trading | Trader and follower experiences
Helped shape flexible copy-trading plans, ProTrader discovery, performance views and follower controls, balancing ease of use for traders with brokers' operational needs.

HR Management PWA | Independent contract for Kiakooshyar
Personally ran stakeholder discussions and discovery, drew initial flows, designed wireframes in Figma and built an AI-assisted PWA MVP for onboarding, performance reviews, 360-degree feedback and employee leaderboards. Delivered to the HR team and currently in use; further work awaits their feedback.

ACADEMIC APPOINTMENTS & UNIVERSITY LEADERSHIP

ISLAMIC AZAD UNIVERSITY | Gorgan Branch, Iran

- Faculty Member: Dec 2010–Jul 2022 (full-time); Aug 2022–Sep 2024 (part-time), alongside overlapping industry roles. Taught software engineering, Data Mining, Algorithm Design and Research Methods; supervised postgraduate research.
- Head of Computer Department: Dec 2010–Apr 2022. Also held a Vice Dean of Education appointment, managing academic staff, programmes and cross-department responsibilities.
- Data Science Researcher: Feb 2016–Mar 2021. Researched text classification, imbalanced datasets, anomaly detection, machine learning and privacy-aware analytics.

ADDITIONAL INDUSTRY ADVISORY

SJI — Part-time Senior Product Strategy Advisor and Board Member, with work on enterprise and smart-city product initiatives.

PRODUCT & TECHNICAL TOOLKIT

Product & design: Product discovery, roadmapping, user stories, acceptance criteria, Figma, Hotjar, usability testing, Event Storming, Jira, Azure DevOps, Agile/Scrum, QA and release planning.
Data & technology: Python, SQL / SQL Server, PostgreSQL, Power BI, customer segmentation, machine learning, NLP, APIs, AI-assisted prototyping (Codex); collaboration on .NET, React, ABP and microservices delivery.

EDUCATION

PhD, Computer Software Engineering (Software Systems) | Islamic Azad University, Sari Branch
MSc, Computer Software Engineering | Islamic Azad University, Mashhad Branch
BSc, Computer Engineering (Hardware) | Sadjad University of Technology.

RESEARCH GRANT

Principal Investigator (PI) | Islamic Azad University Internal Grant, 2018
"Exploring Privacy-Preserving Approaches for the Exchange of Sensitive Academic Data Using Data Mining Techniques." Studied wavelet-based data distortion methods for classifying sensitive data while retaining useful information.

AUTHORED BOOKS

Privacy-Preserving Data Mining | Noroozi Publications, Iran
English for Computer Engineering and IT Students | Makhtumgholi Publications, Iran.

SELECTED PUBLICATIONS

1. Madani et al. Fake News Detection Using Feature Extraction, Natural Language Processing, Curriculum Learning, and Deep Learning (2024). International Journal of Information Technology & Decision Making. DOI
2. Madani et al. KNNGAN: an oversampling technique for textual imbalanced datasets (2023). The Journal of Supercomputing. DOI
3. Madani et al. Fake news detection using deep learning integrating feature extraction, natural language processing, and statistical descriptors (2022). Security and Privacy. DOI

Additional Publications: Google Scholar

JOURNAL REVIEWING & RECOGNITION

Peer reviewer for Cluster Computing, Journal of Big Data, Social Network Analysis and Mining, Scientific Reports, Cognitive Neurodynamics and Discover Computing.
Led first-place line-following robotics teams at Khayyam International Robotics Competition (2014) and Roboland Robotics Competition (2013).
